eDATAFLEX®

Delivering Information to Power Your Business

eDataFlex from Trade Service

Since 1931, Trade Service has been the leading provider of standardized product and pricing information to the wholesale distribution industry. Committed to delivering the highest quality service, Trade Service utilizes a highly trained and professional staff of sourcing, editorial, and industry domain experts to make sure our products perform as expected within your enterprise distribution system.

Automate the labor-intensive process of maintaining your product master file

The Trade Service eDataFlex family of products provides pricing and product information in flexible formats that integrate with all the major business system software packages. Weekly and on-demand updates via our FTP subscription server provide a reliable, automated, and convenient updating process that is proven with thousands of distributors. Regardless of the business system you have deployed, Trade Service has a price and product information updating service that will work for you.

eDataFlex Pricing Service

Everything you need to maintain the price and product information in your business system

- Access 2.1 million items from 720 manufacturers

- Single, weekly update streamlines

Key Features:

- **Flexibility** – Weekly and on-demand updates via FTP or media of your choice

- **Comprehensiveness** – Over 2.1 million items from over 720 manufacturers

- **Compatibility** – Compatible with all major enterprise system vendors including: Epicor, Infor, SAP, DDi System, and others.

Buy it

Key Benefits

- Increased efficiency – Accurate and automatic updating of prices, descriptions, part numbers, UPC codes, discount codes, velocity codes, and other mission critical data elements

- Easily sell non-stock items – Access a complete electronic catalog of all the items you sell, in stock or not

- Enrich your e-commerce catalog – Product images, manufacturer catalog pages, installation instructions, MSDS sheets and more to populate your web storefront and streamline your operations

System Requirements

- Internet connection

- Microsoft® Internet Explorer 8.0 or greater Web browser, Chrome, Firefox

- Adobe® Acrobat® Reader 5.0 or greater

the price and product maintenance effort

- Effectively maintain and merchandise a complete catalog of non-stock items

- Connect to customers with Supplier Xchange

eDataFlex Catalog Connect

Everything you need to enrich your e-commerce applications

- Product names

- Full word product descriptions

- Short descriptions

- Catalog drill-down hierarchy

- Commodity codes

- Product images: standard and thumbnail

- PDF images of manufacturer catalog pages

- Installation instructions

- Spec sheets

- MSDS sheets

Manufacturer Into Stock Price Program

Automatic Processing of All Your Net Price Files!

Start taking advantage of Trade Service's terrific net pricing service – Manufacturer into Stock Pricing (MSP). All you have to do is email the net price files you receive from

your supplier to your Trade Service customer support representative. We'll take care of the sorting, mapping and matching, and put it in your standard weekly update. You'll get the net prices loaded into your system simply by processing your weekly update hassle-free.

There is no additional cost to take advantage of this valuable service!

Supplier Xchange™

- Connectivity to the thousands of TRA-SER® users

- Create closer relationships with your best customers

- Reduce the time and labor spent researching price quote requests

- Gain insight into the quoting activity of your customers

- Enables true EDI between contractor and distributor by providing item synchronization

There is no additional cost to take advantage of this valuable service!

Product Identification Fields
- **Item PIK** – Permanent Identification Key
- **UPC Number** – Formed by combining the UCC Mfr Number and the Item Number, enables automatic identification technology (barcoding, RFID), EDI, and trading partner synchronization
- **Catalog Number** – Part number published in the manufacturer catalog

Price Fields
- **List Price** – As published by the manufacturers and the price on which most suppliers base their discount structure
- **Cost Price** – The published distributor net price (when applicable)
- **Unit of Measure**
- **Discount Code** – Organizes the manufacturer items into groups that share a common discount structure

Basic Image & Attachment Links
- **Thumbnail Image** – Standard scale 80 x 80 pixel image to populate pre-defined screen real estate in web catalog
- **Full Scale Image** – Standard scale 300 x 300 pixel image to populate pre-defined screen real estate in web catalog
- **PDF of Manufacturer Catalog Page** – Image of the page(s) on which the item is shown in the manufacturer's catalog
- **MSDS**
- **Installation Instructions**
- **Spec Sheets**
